

PM45 / PM45c

Industrial Printers

The Honeywell PM45 series industrial printer is designed for high quality label printing in harsh industrial environments. The WWAN connective printer enables 24/7 data communication and real-time visibility of critical data from a wide range of locations.

Enterprises today are facing increasing challenges on production flexibility, inventory turnover, and cost control. The PM45 industrial printer offers high-precision and high-volume printing along with track-and-trace functionality to increase production efficiency and supply chain transparency in food and beverage, pharmaceuticals, manufacturing, warehouse, and distribution center management.

The Honeywell PM45 is built for smart label solutions that help enterprises enhance automation and intelligence in manufacturing and supply chain management for high operating efficiency.

Built on the Honeywell print platform, the durable PM45 printer offers print speeds of up to 14 ips. With print registration of up to +/-0.5 mm, the PM45 printer can ensure high print quality of barcodes, texts, and images, even on small electronic component and pharmaceutical labels. As a highly connected industrial printer, the PM45 is packed with first-in-class WWAN connectivity to enable deployment with minimal limitation from site network topology. The PM45 printer is also scalable to incorporate RFID, parallel, industrial, and applicator interfaces to address your unpredictable business needs in the future.

To support your transformation to intelligent manufacturing and supply chain management, the PM45 printer supports variable network protocols and multiple print languages to enable easy integration into your system whether it's on a local server or the cloud. With the embedded Honeywell software tool Smart Parse, you can quickly change the position, size of objects and barcode, or font type on labels without the need to change the backend system or having any programming skills. Honeywell Operational Intelligence equipped the PM45 printer with the capability of remote management for issues diagnostics and output performance tracking.

The PM45 can support a wide range of media – including ink-in and ink-out ribbons with one-inch core size – enhancing the time between media resupply. With Honeywell's firmware platform that supports multiple print languages, the PM45 printer is an easy replacement for existing Honeywell or mixed printers. A rugged, all-metal print mechanism, easy printhead, and tool-free platen roller replacement, help minimize downtime and maintenance needs.
